

For Immediate Release

EZQUEST INC. ANNOUNCES ITS CINEMA PRO RAID

New Cinema Pro Offers Powerful Performance, Capacity and Value for Creative Content Professionals

MacWorld Expo, San Francisco, CA, January 5, 2008 (Booth 2606) - EZQuest Inc. (www.ezq.com) today announced its Cinema Pro rack-mountable RAID solution for creative content professionals. With space for up to 16 hard drives and 24 TB of storage, the Cinema Pro delivers speed, function and value for video editors who have an ever-increasing need for storage and speed. The Cinema Pro meets the performance, portability, scalability and redundancy standards creative content professionals need for an all-digital workflow.

The Cinema Pro comes in a 16 bay, hot swappable, 3U rack-mountable form factor, with up to 24TB of storage, utilizing an external 20GB/s PCIe bus, it delivers lightning fast data transfer rates of over 900MB/s in RAID Level 0 and over 870MB/s in RAID 5. Speed is not a problem and it will support multi-stream SD, HD and 2K even 4K film environments on Mac or PC workstations. It comes standard with 2GB SDRAM cache memory on a built-in 800Mhz Intel IOP341 I/O processor. The Cinema Pro ships with built in RAID 0, 1, 1E, 3, 5, 6 and JBOD that is configured with EZQuest's GUI RAID utility and offers both a e-mail (SMTP) and remote (SNMP) support notification system. With an optional redundant power supply and RAID cache battery backup module, precious data is made secure at all times and is fully expandable via the equipped 20Gb/s PCI-express extender port that enables daisy-chaining capabilities.

"Not only is the Cinema Pro faster than fiber channel based RAID products because it utilizes an external PCI express extender bus, but the attention to detail and thought put into both stability and data protection will allow users to concentrate on their work rather than their storage" said Ebrahim Zmehr, president of EZQuest. "We have been developing storage solution products for creative content professionals for over 14 years and the Cinema Pro RAID continues our tradition of delivering robust performance and value to a market that takes quality storage products seriously."

The Cinema Pro ships in March 2009 with capacities of up to 24TB and an MSRP starting at \$8,849.

About EZQuest Inc.

EZQuest Inc. was founded in 1994 with the goal of developing and manufacturing superb storage solutions for professional digital content creation applications, while providing the highest level of customer service & product quality. Since that time, EZQuest has emerged as a leader in the cutting edge development of Raid, Firewire, USB, eSATA and SCSI technologies designed for Audio-Video professionals that demand dependable equipment that last for years.
